THE COMPANY

Ortiz y Cía. S.A. is a company located in Cordoba, with more than 40 years of consolidated experience in the manufacturing and commercialization of welded steel tubes for general and special purposes. Its products are available for national and international distribution.

Located in the city of Cordoba, Argentina, began its operations on July 14th, 1958 and from the beginning its growth philosophy has secured its position in the national market.

Over time, the Organization evolved in accordance with the new paradigms imposed by the market; increasing its product range while broadening its commercialization network throughout the country.

In the mid-1980s, it moved its operation to 5195 Don Bosco Ave., a production plant that covered more than 15,000 m² of an extensive lot that occupies more than 69,000 m².

A company of the same group called Sapprime S.A., which is located in Villa Mercedes (San Luis province), completes the production process. Sapprime S.A. uses the latest technology in the manufacturing of various types of steel strips.

The integration of both companies allows the group to place its products in domestic and foreign markets, mainly to Mercosur member countries.

Its growth philosophy for the future is based on the integration of processes that provide added value for its customers.

The philosophy of the Organization is to guarantee that the products it provides can be adjusted to the contractual specification while also satisfying the requirements of its customers by maintaining a consistent level of quality and timely delivery.

QUALITY

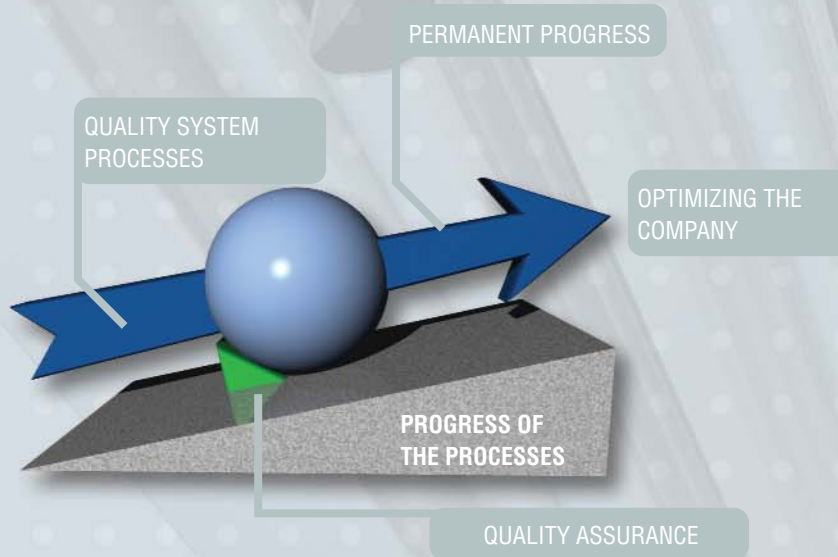

OUR QUALITY POLICY

It is Ortiz y Cía. S.A.'s policy to manufacture and commercialize products that satisfy the present and future needs of our clients.

Therefore, our way of thinking and acting strictly complies with the established procedures of our Quality System which follow the guidelines of the ISO-9001-00 standard that guarantees quality from reception through to the expedition, passing through all the stages of manufacturing while continually promoting improvements in all the processes involved in production.

Our personnel becomes the most important guarantee of the application of this policy.

SERVICES

SERVICES FOR OUR CLIENTS:

Ortiz y Cía. S.A. provides a wide range of welded steel tubes and structural C channels. The focus is to satisfy a range of diverse usage possibilities by providing products that strengthen the competitiveness of our customers:

- Ø **Standard and Special Lengths**
(to avoid extra costs in cut to length pieces)
Standard length 6.000 mm
Special length from 4.000 to 8.000 mm
- Ø **Structural C Channels**
Standard length 12.000 mm
Special length from 4.000 to 8.000 mm
- Ø Deburred end cuts
- Ø Cut-to-length pieces with deburred end cuts
(Lengths from 30 to 4.000 mm)
- Ø Round, square and rectangular tubes with inner weld bead removed
- Ø Delivery in customer facilities.
- Ø Various types of packaging.
- Ø Assistance in special projects (products, logistics and services).
- Ø New products development.
- Ø Quality assistance.
- Ø The study of tubes with special grades of steels (microalloyed steel / structural steel).
- Ø Sales assistance in Buenos Aires, Córdoba, Santa Fé, Mendoza, San Luis, Salta y Tucumán.

PRODUCTS

The scope of products offered by the group involves:

- ∅ Steel Sheets
- ∅ Steel Strips
- ∅ Round, square and rectangular welded steel tubes
- ∅ Steel pipes for structural use
- ∅ Coated Seam Galvanized tubes
- ∅ Specially shaped welded steel tubes and closed profiles (banisters, semioval wing, window profile, etc.)
- ∅ Structural C Channels

steel tubes

MANUFACTURING STANDARDS

Ortiz y Cía. S.A. relies on its manufacturing processes, commercialization and after-sales service of Welded steel tubes (including cut and shaped pieces) and open cold formed steel shapes, certified under ISO 9001-2000 standards which guarantee the reliability of the processes involved in all the stages of the production chain.

The reference standards used in the manufacturing of Ortiz y Cía. S.A.'s products are:

IRAM-IAS-U-500-206-3 Open cold formed steel shapes for structural purposes.

IRAM-IAS-U-500-2590 Electric-resistance-welded carbon and alloy steel tubing for mechanical application.

IRAM-IAS-U-500-2592 Welded carbon steel tubing for structural use.

ASTM A513 Standard Specification for Electric- Resistance-Welded Carbon and Alloy Steel Mechanical Tubing.

PRIZES AND AWARDS

"INVERTIR" nationwide Prize awarded by Invertir Foundation.

"DÍA DE LA EXPORTACIÓN" Prize awarded by the Córdoba Chamber of Foreign Trade.

FICO Prize - Metallurgical Sector.

FICO Grand Prize - All sectors.
